

EVOAQ HOME VENTILATION

Air Optimisation Software (AOS)

Low Energy Use

Moisture Control

Building Code Compliant

PM2.5 Filter

Designed in New Zealand

NEW ZEALANDS MOST ADVANCED HOME VENTILATION

Maintain thermal comfort throughout your home - no more cold bedrooms caused by old fashioned ventilation systems.

No more surprises on your power bill with our *A-Rated energy use fans*.

Control moisture and dampness with continuous ventilation and air optimisation software controls and whisper quiet fan technology.

Compliant with NZ Building Code G4 and International ASHRAE6 62.2 standards.

Designed and built in Auckland, New Zealand.

Installed by HomeSol with more than 20 years experience in NZ homes.
